

Gas Safety Is a
Shared Responsibility

Emergency Actions – What To Do If You Smell Gas or Your Alarm Sounds

Why It Matters

Quick, calm action protects lives.

If You Smell Gas or Your Alarm Sounds:

1

Do not ignore it.
Treat every alarm or odor as serious.

2

Evacuate immediately.
Leave the house or building without delay.

3

Do not use electronics or switches. Even turning on a light could spark ignition.

4

Call 911 and your utility company once you are outside and at a safe distance.

5

Do not re-enter until professionals say it is safe.

Shared Responsibility Tip:

Natural gas alarms provide the earliest warning that it's time to act. Make sure your family includes alarms in evacuation drills.
