

LET'S MAKE A NATURAL GAS SAFETY PLAN!

Natural gas helps power your home, but if there is a gas leak, it can be dangerous. That's why it's important for your family to have a plan, just like with fire drills!

Safety Tips

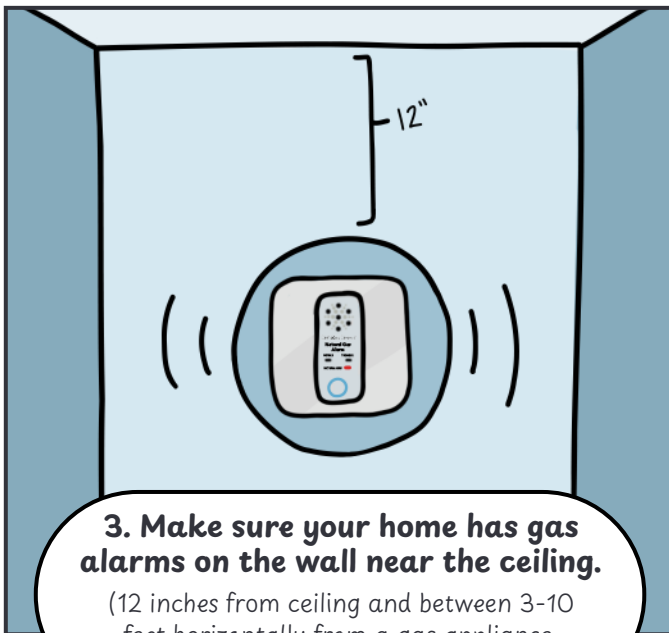

1. Sit down with your family and make a gas safety plan together.

(Grown-ups can check out [NFPA.org](https://www.nfpa.org) for helpful tips!)

2. Choose a safe spot outside where everyone will meet.

3. Make sure your home has gas alarms on the wall near the ceiling.

(12 inches from ceiling and between 3-10 feet horizontally from a gas appliance. You might need more than one!)

4. Practice your gas safety plan so everyone knows what to do!

(Everyone has an important job - like calling 911 or making sure no one gets left behind.)
